

SPEAK OUT AGAINST PSYCHIATRY

27th July 2011, 4-6pm
outside the Royal College of Psychiatrists
17 Belgrave Square,
London, SW1X 8PG.

Come along to have your say, or just to show
your support.

Followed by a Picnic in Hyde Park

Psychiatry does more harm than good.

Anti-Depressants and Anti-Psychotics are dangerous and do not cure, they just hide symptoms.

Electro-convulsive therapy is dangerous and not very effective.

Community Treatment Orders are a human rights disgrace.

Diagnosis does not help and is stigmatising.

What people who are mentally distressed need is intense social support, not medical professionals and drugs.

Things have got to change.

Tell the psychiatrists what you think of them.
